MY FANGtastically EVIL VAMPIRE PET
Activity Kit

My FANGtastically Evil Vampire Pet series
by Mo O’Hara; illustrated by Marek Jagucki | Ages 7–10
Activity #1: HELP FANG HIDE!

Oh no! Fang has escaped the tent where Mark had hidden her. Help her find her way back before she’s caught!
Activity #2: **SPOT THE DIFFERENCE**

Bob & Diablo are taking a quick lunch break.
Can you find five differences between the two images below?

---

Mark is hiding Fang from Geeky Girl.
Can you find five differences between the two images below?
Activity #3: EVIL SCIENTIST WORD SEARCH

Find the “evil” words hidden in the word search puzzle below.

SCIENTIST
ASTRONAUT
GEEKY GIRL
POWERFUL
EMPEROR
KITTEN
STRONGARM
EXPERIMENT
ROCKET
ANTIDOTE
SIMULATION
IGOR

by Mo O’Hara; illustrated by Marek Jagucki | Ages 7–10
Activity #4: **STIR UP SOMETHING EVIL!**

Follow the instructions below to create your very own **GREEN SLIME**. It would make even the Great and Powerful Mark proud.

---

**What You Need**
- School glue
- Borax
- Green food coloring (optional)
- Water
- Two bowls

**What You Do**

1. In one bowl mix 1 oz. glue (about ¼ of a small glue bottle) and ¼ cup water. If you want GREEN slime, add food coloring to the glue-and-water mixture.

2. Add ¼ cup of borax to the glue-and-water mixture and stir slowly.

3. The slime will begin to form immediately. Mwhaaa-haa-ha!

4. Stir as much as you can, then dig in and knead it with your hands until it gets less sticky. This is the messy part, but it allows everything to come together so dig in and don’t be shy! (Don’t worry about any leftover water in the bowl; just pour it out.)

5. **SHOW IT OFF!**

*When you’re not terrorizing non-evil scientists with your awesome slime, store it in a plastic bag in the fridge to keep it fresh.*

---
Activity #5: CONNECT THE CONSTELLATIONS!

There are 5 constellations hiding in the starry night sky below.
Connect the dots to reveal them.

- Big Dipper
- Orion
- Cancer
- Aries
**Activity #6: FLY SKY HIGH!**

Follow the instructions below to build a balloon rocket, just like you would at Evil Scientist Space Camp.

**What You Need**

One plastic drinking straw  
Rubber band  
Paper  
Scissors  
Tape

**What You Do**

1. Place your balloon on the top end of the drinking straw. Fasten a rubber band securely around the balloon so that it is sealed to the end of your straw.

2. Cut out four triangles. Tape them to the bottom of your straw (the end without the balloon) so it looks like a rocket. Leave a little room at the bottom so you can put your lips around the straw.

3. While holding the rubber band against the balloon (so it doesn’t fly off), blow up your balloon.

4. Blast off! Let your balloon-rocket fly! Try different sizes of triangles and balloons. See how high you can make your rocket go.
